

Problem Set 19 Discussion

24 Feb 2026

Kayla Wilhoit

General Reminders

- Problem set grades almost finished – will be uploaded to Canvas later this week
- Required data lunch reflections this semester so far:
 - Diego Gafias Gallegos – 22 Jan
 - Fay-Wei Li – 05 Feb
 - RP Pornmongkolsuk – 12 Feb
 - Let me know if you had an excused absence!
- Casual “office hours” this week:
 - **Wednesday Feb 25th 4:00-5:30**
 - **Friday Feb 27th 4:00-5:30**
 - I will be working in FFSC 3135B (southwest end of the hall) – feel free to drop by or shoot me an email if you want to Zoom!

- Using **basename** with the **-s** flag to match on a suffix (.jpg)

```
basename -s .jpg dogs/chester.jpg
```

- Note that **basename** treats the provided filepath as a string and doesn't care if the filepath actually exists!

```
basename crypto/fake_directory/crypt_capsule_shedding.jpg
```

- Using **-exec** requires your script to be executable
 - Use **chmod +x {script name}**

```
chmod +x resize_jpeg.sh
```

```
find . -name '*.jpg' -not -path "./resized_images/*" -exec ~/example_images/resize_jpeg.sh {} 25 \;
```

- Using **parallel** to resize images to 10% 25% and 50%

```
parallel -I '^' 'find . -name "*.jpg" -not -path "./resized_images/*" -exec ~/example_images/resize_jpeg.sh {} ^ \;' ::: 10 25 50
```
